

## DATA SHEET

# Collaborate with ACO Partners in Population Health

With the shift to value-based care, achieving healthy outcomes is a key priority. Without analytics to stratify and identify high-risk, high-cost patients, interventions are often guided by guesswork or inaccurate historical data. MedeAnalytics Population Health aggregates clinical and claims data to help you identify and understand at-risk populations, improve care management and engagement, and ultimately enhance population health and value-based care initiatives.

REVIEW PATIENT MEDICATION COMPLIANCE TO EASILY ANALYZE POPULATIONS WITH MEDICATION COMPLIANCE ISSUES

### With MedeAnalytics Population Health, you can:

- Target at-risk patients for care management interventions
- Stratify patients and populations for timely action
- Promote adherence to prescribed medications
- Identify potential admissions and readmissions with predictive analytics
- Share data while driving cost and quality improvements
- Manage multiple population health initiatives with limited resources
- Track cost savings, utilization trends, and PMPM targets
- Link all patient data to one master ID

## POPULATION HEALTH

### WHO IS IT FOR?

CMOs, ACO directors, care management staff, population health managers, and clinical analysts.

### WHAT DOES IT DO?

Generates actionable intelligence from clinical and claims data to help health plans improve population health initiatives.

### WHY DO YOU NEED IT?

- Collaborate with ACO partners in population health
- Gain a holistic view of patients
- Quickly track utilization and costs
- Identify medical cost reductions
- Protect the health plan's reputation

### HOW DOES IT WORK?

Data aggregation, robust workflows, and actionable business intelligence provide insight into cost, utilization, and risk metrics.

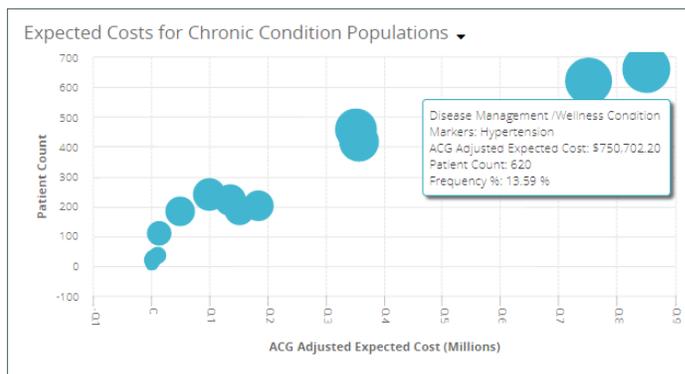

## Analyze Population Health Outcomes

Rapid report generation and flexible drill-down capabilities enable you to understand the trends and drivers impacting cost and utilization across populations. The solution combines clinical and claims data with predictive models, quality measure calculations, gaps in care, and best practice models and rules. With high-level insight, you can monitor risk-adjusted expenses, medical and pharmacy costs for chronic diseases, and accountable care initiatives.

## Identify Chronic Conditions and Actionable Areas

MedeAnalytics Population Health takes the guesswork out of care management, quickly identifying which patients are at risk, why they're at risk, and who would benefit from outreach and education. You can monitor:

- Medication non-compliance
- Pre-diabetic and hypertension indications
- Conflicting, duplicative care
- Potential admissions and readmissions

UNDERSTAND PATIENT COMPLIANCE WITH MEASURES SPECIFIC TO CONDITIONS LIKE DIABETES

## Measure Cost Improvements and Manage Risk

Use insights to share and track success metrics and measure the effectiveness of interventions. You can monitor risk-adjusted expenses and manage costs for chronic disease populations with insights into:

- Readmissions and avoidable admissions
- High-cost radiology services
- Brand-name vs. generic drug utilization rates
- Emergency department utilization
- Clinical episodes of illness and related services

For more information about Population Health, go to [www.medeanalytics.com/solutions/population-health](http://www.medeanalytics.com/solutions/population-health).

## ROI

- Decrease time spent reporting on and tracking utilization and costs by 30%
- Reduce annual medical/pharma costs by 5%

“We have chosen an experienced analytics partner to support our population health efforts, as a foundational stepping stone to broader participation in ACOs with other payers and employers.”

*Richard Boehler, M.D.  
Former CEO, St. Joseph Hospital  
Covenant Health System*

## FOR HEALTH PLANS

### Value Based Performance:

- Population Health
- Quality Management

### Payer Operations:

- Healthcare Economics
- Employer Reporting
- Provider Analytics

### Enterprise Performance Management

- Action Planning
- Progress Tracking
