

DATA SHEET

Improve Outcomes with Employer Plan Insights

In a competitive marketplace, health plans must improve transparency with employer clients and help them understand whether their efforts to keep employees healthy are working. However, it can be time consuming to aggregate disparate data, run complex analysis, and address questions.

MedeAnalytics Employer Reporting enables health plans to easily share valuable cost and utilization intelligence and opportunities to fine tune programs. Health plans can demonstrate plan value by sharing detailed account and group reporting with employer clients and third-party vendors—allowing for timelier, smarter decisions.

VIEW COST AND UTILIZATION DATA AT A GLANCE

With Employer Reporting, You Can:

- Provide employers with an integrated view of plan performance
- Create and auto-distribute customized, print-friendly employer reports
- Ensure internal and external stakeholders—employer groups, brokers, account managers, client consultants, third-party administrators, and providers—receive the same, correct information
- Benchmark the entire book of business with the same granularity as any account
- Track the effectiveness of stop-loss offerings
- Ensure HIPAA compliance with role-based security
- Integrate with an existing client portal

EMPLOYER REPORTING

WHO IS IT FOR?

- Account managers, brokers, and client consultants
- Employer groups and third-party administrators

WHAT DOES IT DO?

Offers immediate insights into the cost and quality of care of health plan members

WHY DO YOU NEED IT?

- Create high-impact reports quickly and efficiently
- Improve client retention and satisfaction
- Identify cost drivers in employer groups
- Make proactive, data-driven decisions to support renewals
- Access robust, interactive analyses

HOW DOES IT WORK?

Combines deep knowledge of employer reporting with analytics and data integration expertise.

Improve Client Satisfaction with Immediate Insights

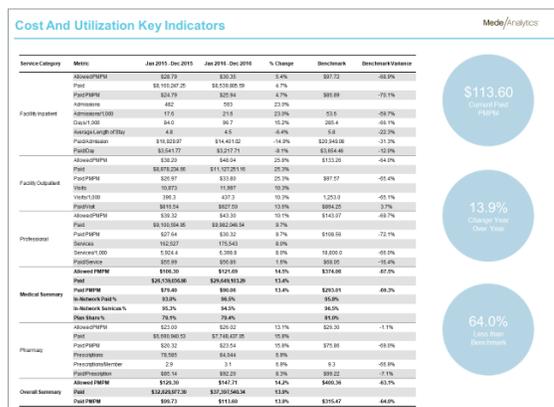

MedeAnalytics Employer Reporting offers a secure, web-based single source of truth for proactive communication of trends and key performance indicators. Account-specific, self-service analytics support:

- Employer, group, and subgroup breakdowns
- Standard print-ready and paid lag reporting
- Employer group cost and utilization forecasting
- Drill-down capabilities into cost, utilization, and clinical measures

Create Sophisticated, Interactive Reports with Speed and Efficiency

With Employer Reporting, you can view data quickly—often in 48 hours or less—and create sophisticated, interactive reports. You can access standard reports or customize them with any data elements for a complete view of care.

- Slice data by geography, age, gender, utilization, and more
- Access standard reports or generate custom reports on the fly
- Print, save, and share reports in an intuitive interface

SHARE INSIGHTS THROUGH DYNAMIC TEXT, DASHBOARDS, AND GRANULAR BENCHMARKS

Generate Impressive Print-Ready Reports

Support renewal discussions and account strategies with highly formatted, print-ready reports that demonstrate the value of your services. You can automatically generate reports with standard data or modify the content and design to your specific needs. Reports can be produced on demand or automatically on a daily, weekly, monthly, quarterly, or annual basis.

ROI

- Insights shared 5x sooner than the competition
- Information gleaned 60x faster, even for the largest groups
- Reports generated in 50% less time
- Ad-hoc reports generated 75% faster

CASE STUDY

After eight years with an out-of-the-box legacy solution and with 15 million members, the nation's largest customer-owned health insurance company needed analytics for a large volume of analysis in one environment. Now, they generate more than 30,000 reports in just two days.
