

### DATA SHEET

## Make Even Better Decisions with a Healthcare-Ready Analytics Platform

Capitalizing on your data requires more than just generating reports. It requires an innovative, self-service analytics platform that includes visualization, workflows, predictive analytics, benchmarking, guided analysis, and even machine learning. The MedeAnalytics platform includes all of this and more—enabling you to unlock quantifiable business value from your data.

Realizing the true value of your business data requires an analytics platform that extends across your enterprise and leverages your existing data infrastructure. The MedeAnalytics platform does just that with a foundation of powerful analytics technologies and capabilities including:

- Comprehensive data orchestration
- Technology stack representing today's elite technology vendors
- Visualization and workflows that turn raw data into meaningful insights
- Predictive analytics and emerging technologies like guided analysis and machine learning
- Healthcare-specific dashboards, benchmarking, reports, alerts, and more
- Platform as a service that offers the flexibility to design your own analytics solutions

### THE MEDEANALYTICS PLATFORM

#### WHO IS IT FOR?

- Payer and provider executives looking to unlock business value from their data

#### WHAT DOES IT INCLUDE?

- Comprehensive data orchestration
- Intelligent tools like predictive analytics and guided analysis
- SaaS analytics solutions for healthcare
- Platform as a service capabilities

#### WHY DO YOU NEED IT?

- Use your data to make even smarter decisions
- Leverage your existing data infrastructure with enterprise-wide analytics
- Get insights into the hands of those who need them most
- Use a single platform for decision-making across the enterprise

## Generate Valuable Insights with Visualization and Workflows

The MedeAnalytics platform offers a common look and feel with a superior user experience, ensuring the visualization capabilities you need to understand your data. Benchmarking and drill-down capabilities are built into the platform so you can easily spot trends, draw comparisons, and ask questions of your data. Integrated workflows capitalize on these insights and boost collaboration throughout the organization.

## Ensure Data Security and Integrity

With comprehensive data integration and enterprise-grade security, the MedeAnalytics platform ensures the integrity of your data. The platform integrates data from multiple sources and enables security with role-based access, making sure data gets into the hands of the right users—and no one else.

## Better Understand Your Data with Machine Learning

Leveraging the industry's latest technologies, the MedeAnalytics platform offers machine learning capabilities that can be trained to identify anomalies in your data and pinpoint areas that need attention. With linear regression models, the platform will recognize that a spike in activity isn't an anomaly but an expected pattern identified in historical data.

## Intelligently Drill Down into Your Data with Guided Analysis

After an anomaly is detected through machine learning, guided analysis offers intelligent drill-down paths that quickly explain the root causes of negative performance trends.

## Predict Future Outcomes and Trends

There's more to data analysis than what occurred in the past. To truly capitalize on your data, you need to be able to predict future outcomes. The MedeAnalytics platform uses predictive analytics with data mining, statistical modeling, and machine learning to improve forecasting.

## Customize and Innovate with Platform as a Service

Recognizing that you may require additional analytics functionality not included in our solutions, MedeAnalytics offers our platform as a service. This offers the flexibility for you to import data, associate it with your own dashboards and views, and integrate it with other MedeAnalytics solutions. You can keep all your data on a single platform while maximizing the data integrity, data stability, and visualization capabilities available on the MedeAnalytics platform.

## TESTIMONIAL

“We exist to improve the health of patients, members, and communities we serve. As healthcare becomes more complex, having unified reporting and analytics tools becomes increasingly important to our work to care for those we serve.”

*Soyal Momin  
VP of Data and Analytics  
Presbyterian Healthcare Services*

## PROVIDER SOLUTIONS

### Revenue Cycle Management

- Patient Access
- Revenue Integrity
- Business Office

### Value Based Performance

- Population Health
- Quality Management

### Cost and Operations

- Supply Chain
- Labor Productivity
- Service Line
- Throughput

### Enterprise Performance Management

- Action Planning
- Progress Tracking
